Education

Bachelor of Arts in Computer Science, Seattle Pacific University, *summa cum laude*

2026

High School Diploma, Shorecrest High School

2023

Programming Projects

Senior Capstone Project:

Seekr:

A web extension that helps users apply to and track jobs. Seekr received good reviews from the attendees at the Erickson Conference (a simulation of a trade-show, open to the public) and the Board of Advisors for the class (a group of 10-20 people either currently working in or recently retired from the industry).

- Coded using the WXT framework (and thus TypeScript)
- Provided backend resources for Gemini API calls
- Implemented a persistent client-side database to store job postings
- Used Git/Github version control
- Used the Scrum framework for team processes
- Implemented responsive design elements using ReactJS
- Implemented automated regression tests using Playwright
- Performed manual tests of new functionality

Certifications

- Microsoft Azure Developer Associate Certification (2025)
- Google IT Professional Support Certificate (2024)
